PROFILE

Reliable and skilled front-end developer with 4+ years of experience working on cross-functional teams to translate business objectives into clean and scalable code. Adept in communicating across disciplines, managing code deployments and team processes, and delivering solutions to improve user experience on public-facing web properties. I am passionate about bridging the gap between technical and non-technical teams with sustainable, component-driven designs on popular content management systems.

EXPERIENCE

FRONT-END DEVELOPER → SOFTWARE ENGINEER | RELIAS

2019 - Present

Relias is a leading provider of education, training, and workforce enablement solutions for human services and healthcare organizations. As Front-End Developer, my experience and accomplishments include:

- Managing a close-knit development team of junior developers and QA testers for six Wordpress-based web properties, including relias.com and advertise.nurse.com.
- Refactoring and reducing stylesheet size for relias.com by more than 70%, optimizing JS payloads, and improving site page load times by 50-60% on average.
- Redesigning company websites with an updated brand presence and new libraries of user-focused CMS components for rapid page building by non-technical teams.
- Running biweekly code deployments in an Agile sprint cadence to launch new features and keep existing tools and dependencies up to date.
- Mentoring junior developers by leading code reviews, writing technical documentation, and setting process standards for creating sustainable code.
- Collaborating with project managers, UX designers, SEO marketers, content writers, and IT/Infosec teams to deploy solutions that meet diverse departmental objectives.

DESIGN ASSOCIATE → SENIOR DESIGNER | PARTICIPATE LEARNING / VIF

2013 - 2019

Participate Learning/VIF is a global education and cultural exchange company. Through my tenure, my experience and accomplishments included:

- Developing a new cultural exchange online application experience, resulting in a 100%+ increase in applications submitted the following recruitment season.
- Creating and launching a new company brand, Participate, by leading a design team at every stage, from research to pitching final concepts to executives.
- Designing and developing responsive landing pages for programs and downloadable content, driving lead prospects to internal sales teams.
- Managing the company's Wordpress instance, working with marketing and SEO teams to optimize performance, raise accessibility and build new page content.
- Mentoring non-technical teams and writing documentation to support the transition of print data to digital formats.
